FAX (716) 881-6678

As per our November 24, 2020 correspondence, teachers remain very concerned not only with the new grading policy itself, but also the implementation of it when grades were already submitted.

The suggestion that the final grade can be "I" if the teacher deems it appropriate, will provide a more reasonable assessment for students and provide time to review the policy and input (which should have been done).

We would appreciate a timely response as grades are due this week.
